

## **Artist information Cie**

### **Biography**

Cie is living in Cologne and started producing music back in the nineties. After a few years he released his first records on labels like Deep and Dark Recordings and Broque. A part of his work between House and Techno was used as soundtrack for the well known TV broadcast "Spacelight" on German Television. After his EP "Auf Los" 2018 on Form&Terra records he also started working on making remixes for Off Records, Modart Music and Noreira Records. Due to his love to hardware synthesizers he became a member of the live project called "Drehkommando" which performs improvisational techno without any scripts. But he is also playing live as one man show and is presenting his own tracks in his live show.

### **Discography**
