

Morgen Wurde & Tis enhance the mental dimension of deep techno by electroacoustic sounds. Alienated acoustic instruments elevate the mental dimension of the dance experience to mystic heights. Symphonic grandeur, archaic drone, occult clang and hypnotic beats are fused in their music in a supernatural manner. The two producers from Northern Germany evoke the majestic and threatening ambivalence of the forces of nature, set to dark romantic hybrids of ambient, neo-classical and minimal techno music.

Morgen Wurde's solo work includes album CDs on Off Rec., Time Released Sound and Frozen Light, plus EPs, remixes and contributions to recent episodes of the iconic Pop Ambient compilation series on Kompakt Records, curated by Wolfgang "Gas" Voigt.

Tis' solo work has taken on epic proportions under various project names on his own labels (formerly) Verform Records and Roo Records. Today his main projects are Klordop (for ambient techno) and Synthese (for space music).

Joint discography:

Morgen Wurde – Welter Records #051 [EP], incl. Tis & Klordop Remixes (Welter Records 2018)
